WASTE SOURCE Processing of POCO wastes from MEP, Thorp and WEP.

PHYSICAL CHARACTERISTICS

General description: Cave construction materials and equipment.

Changes since waste generated: This waste will be packaged 'as is' with only size reduction if appropriate to fit a waste container.

Bulk density (t/m³): = 2.9

Comment on density: The quoted density is based on the assumption that each package will contain 0.1m³ of metal that is encapsulated in grout.
