WASTE TYPE ILW

WASTE VOLUMES

	Reported (m ³)	OR	Conditioned (m ³)	Packaged (m ³)
Stocks:	At 1.4.2025			
Future arisings:	~ 1.0			
Total future arisings:	0.0			
Total waste volume:	1.0			

Number of waste packages in stock: At 1.4.2025..... - packages

Comment on arising rates: -

Additional information on quantities: ~11 te of thorium metal bars. 8,230 bars of thorium with varying dimensions stored in 130 ammo boxes.

Uncertainty factors on volumes:

Stock (upper):	x 1.10	Arisings (upper):	x -
Stock (lower):	x 0.90	Arisings (lower):	x -

WASTE SOURCE Reactor-grade natural thorium metal bars, purchased but never used in reactor programmes. 8,230 bars stored in 130 ammo boxes

PHYSICAL CHARACTERISTICS

General description: Thorium metal bars - manufactured by reducing thorium dioxide with calcium metal to yield thorium metal powder which was sintered to form cylindrical bars. It is assumed at present that the bars has a pyrophoric hazard associated with them.

Changes since waste generated: -

Bulk density (t/m³): ~ 11.3

Comment on density: Metal manufactured by a sintering process which results in an average density of 11.3 g/cm³, compared to the theoretical density of 11.72 g/cm³. The value is consistent with densities quoted for other sintered thorium and is lower partly due to the inclusion of oxide, and partly due to the porosity of the metal.

CHEMICAL COMPOSITION

General description and components (%wt): Thorium (>98%), Thorium oxide (<2%).

Chemical state: -

Sheet metal proportion / thickness: -

TREATMENT, PACKAGING AND DISPOSAL

Planned on-site / off-site treatment(s):

Treatment	On-site / Off-site	Stream volume %
Size reduction Decay storage Low force compaction Supercompaction (HFC) Incineration Drying/dewatering/liquid separation Tie down/fixatives/strippable coating/painting application Decontamination Metal treatment Recycling / reuse Thermal treatment, including vitrification Encapsulation Polymer encapsulation Other physical treatment Other chemical treatment Containerisation Treatment not yet determined None	On-site	100.0

Comments on planned treatments:

-

Conditioning method:

The current baseline is for the waste to be polymer passivated and packaged in 1 off 6 m3 CB followed by further encapsulation at Winfrith.

Conditioning plants:

Plant Name	Location
WIN encapsulation station	Winfrith

Likely conditioning matrix:

Unknown

Further information on the conditioning matrix:

-

Waste Packaging:

Likely container type:	Container	Waste packaged (vol%)	Waste loading (m³)	Payload (m³)	Number of packages	Estimated start date for packaging
	6 m³ concrete box (HD)	100.0	1.0	5.8	1	-

Range in container waste loading: -

Other information on packaging and conditioning: -

Conditioned density (t/m³): -

Conditioned density comment: -

Management Routes:

Disposal Route	Stream volume %	Raw density t/m³	Start date
Expected to be consigned to a Near Site, Near Surface Disposal Facility (Scotland)	100.0		
Expected to be Non-NSD HAW managed under Scottish Government's policy			
Expected to be disposed to LLW Vaults NRS Dounreay			
Expected to be consigned to the Geological Disposal Facility			
Expected to be consigned to a Near Surface Disposal Facility			
Expected to be consigned to the LLW Repository			
Expected to be consigned to a Landfill Facility			
Expected to be disposed On-Site			
Expected to be managed by In-Situ Disposal			
Expected to be consigned to an Incineration Facility			
Expected to be consigned to a Metal Treatment Facility			
Expected to be Out of Scope			
Expected to be recycled / reused			
Disposal route not known			

Classification codes for waste expected to be consigned to a landfill facility:

Opportunities for alternative disposal routing: No
