Comments on planned treatments:

Conditioning method: It has been assumed the Waste will be transferred to a Type VI DCIC, however this is subject to the necessary BAT studies and has not been confirmed. Waste is assumed to be co-disposed in a total of three Type VI DCICs with 9H24, 9H27, 9H33, 9H34 and 9H35. One of which has been allocated to this stream.

Conditioning plants:
