| Total waste volume:    | 65.4                       |    |                               |                            |

Number of waste packages in stock: At 1.4.2025..... - packages

Comment on arising rates: For inventory purposes the arisings are assumed to arise at a uniform rate over 20 years.

Additional information on quantities: Reactor Dismantling & Site Clearance is assumed to commence in 2060 and last for 20 years. The volumes and radioactivity have been calculated for 45 years after reactor shutdown, i.e. 2060. Waste has been deferred from IDW waste stream 9H929 to RDC.

Uncertainty factors on volumes:

## TREATMENT, PACKAGING AND DISPOSAL

Planned on-site / off-site treatment(s):

| Treatment                                                  | On-site / Off-site | Stream volume % |
|------------------------------------------------------------|--------------------|-----------------|
| Size reduction                                             |                    |                 |
| Decay storage                                              |                    |                 |
| Low force compaction                                       |                    |                 |
| Supercompaction (HFC)                                      |                    |                 |
| Incineration                                               |                    |                 |
| Drying/dewatering/liquid separation                        |                    |                 |
| Tie down/fixatives/strippable coating/painting application |                    |                 |
| Decontamination                                            |                    |                 |
| Metal treatment                                            |                    |                 |
| Recycling / reuse                                          |                    |                 |
| Thermal treatment, including vitrification                 |                    |                 |
| Encapsulation                                              |                    |                 |
| Polymer encapsulation                                      |                    |                 |
| Other physical treatment                                   |                    |                 |
| Other chemical treatment                                   |                    |                 |
| Containerisation                                           |                    |                 |
| Treatment not yet determined                               |                    |                 |
| None                                                       |                    | = 100.0         |

**RADIOACTIVITY**

Source: The activities quoted are those at 45 years after reactor shutdown, i.e. in 2060. There may be some contamination by Cs137.

Uncertainty: -

Measurement of radioactivities: -

Chemical form of radionuclides:

- H-3: The chemical form of tritium has not been determined.
- C-14: The chemical form of carbon-14 has not been determined.
- Cl-36: Chemical form of chlorine 36 has not been determined.
- Se-79: The chemical form of selenium-79 has not been determined.
- Tc-99: The chemical form of technetium-99 has not been determined.
- I-129: -
- Ra: The chemical form of radium isotopes have not been determined.
- Th: The chemical form of thorium isotopes have not been determined.
- U: The chemical form of uranium isotopes have not been determined.
- Np: The chemical form of neptunium isotopes have not been determined.
- Pu: The chemical form of plutonium isotopes have not been determined.

#### Bands (Upper and Lower)

A a factor of 1.5  
B a factor of 3  
C a factor of 10  
D a factor of 100  
E a factor of 1000

Note: Bands quantify uncertainty in the mean radioactivity.

#### Code

1 Measured activity  
2 Derived activity (best estimate)  
3 Derived activity (upper limit)  
4 Not present  
5 Present but not significant  
6 Likely to be present but not assessed  
7 Present in significant quantities but not determined  
8 Not expected to be present in significant quantity  
\* Total calculated from the 114 declared radionuclides
