Treatment	On-site / Off-site	Stream volume %
Size reduction Decay storage Low force compaction Supercompaction (HFC) Incineration Drying/dewatering/liquid separation Tie down/fixatives/strippable coating/painting application Decontamination Metal treatment Recycling / reuse Thermal treatment, including vitrification Encapsulation Polymer encapsulation Other physical treatment Other chemical treatment Containerisation Treatment not yet determined None	Off-site	= 100.0

Comments on planned treatments:

Drums will be supercompacted at Dounreay before being placed in HHISOs. The waste will be encapsulated before final disposal to the Dounreay LLW Facility following site handover in 2028, at which point NDA / NRS Dounreay will take ownership.

Conditioning method:

No decisions made on conditioning process until site handover in 2028, at which point NDA / NRS Dounreay will take ownership.
